

“Origin: Beyond Life” is an Adventure drama based in the most recent theories and researches carried out about the physical, social and cultural origin of the oldest artificial mummies of the world: The Mummies of the Chinchorro culture (7000 B.C. – 2000 B.C.).

ABOUT “ORIGIN BEYOND LIFE”

In 7000 B.C. emerged one of the oldest, most fascinating and mysterious inhabitants of the planet, unique in the universal archeology, who left their funerary art (mummies) as an exceptional testimony of their existence.

ORIGIN BEYOND LIFE tells a story about human and social evolution. Adventures and mysteries that once revealed will enlighten the aspects of the wisdom, bravery and skills of a people who went beyond knowledge, as we know it today.

4000 years after its missing, a really insignificant step if we consider the age of our planet, it seems that there has been enough for us to have lost the links that once existed between man, the Earth, life, the ocean and the universe.

ORIGIN wishes to go beyond the entertainment and the adrenaline that the conflicts between clans, the hunting of great cetaceans and the natural disasters will produce. Also, it aims to be an unrepeatable experience throughout the edges of existence and surviving: BEYOND LIFE.

Feature Film

Runtime: 120 minutes

Language: English

Film Genre: Adventure/Drama

Aspect Ratio: 2:40 Color

FILMMING LOCATIONS

All the chosen locations to shoot **ORIGIN: BEYOND LIFE** will be protagonists of extreme beauty and plasticity. The Altiplano, the Andes, the Atacama Desert, the Salar de Uyuni and the Pacific Coast are natural scenarios where 80% of the scenes will be shot. The remaining scenes will be carried out in a specialized studio and in a digital construction studio.
